

# LSI Tissue Processing Facility

## **Training Policy**

*April 2011*

1. Training of Clients on the TP Cryostat and Microscope will be done ONLY by **Megan Gilmour**, [meg.gilmour@gmail.com](mailto:meg.gilmour@gmail.com) The training will consist of one-on-one training (or up to a group of three from the same lab) with an LSI supplied or acceptable client-supplied sample to be imaged during the training session.
2. A training session will normally be defined as a one hour 'session' on the microscope and cryostat but is ultimately up to the discretion of Megan.
3. If clients have not used the LSI TP facility before but have prior TP experience may opt for a "refresher" session. Please contact Megan.
4. Training is free of charge.
5. On successful completion of 'training', the client will be assigned a username login and password to the online booking calendar.
